Scope: Paper 1 Grade 10

Date 6/7/2026

1. Number Patterns
    a. Finding the general term
    b. Calculating a specific term
    c. Calculate the position of a term
    d. Using the common difference in calculations, where the value of a variable must be found
2. Exponents
    a. Expressions
    b. One-term expressions
    c. Expressions with an HCF
3. Simplifying expressions
4. Factorising
5. Graphs
    a. Sketching of straight line, parabola, hyperbola and exponential graphs
    b. Finding the equations of the same graphs
    c. Interpretation of graphs including reflections, intersection of graphs and inequalities with graphs
6. Equations
7. Inequalities
8. Problem solving – word problemsExam
